제품명 : Sequoia - Digital Audio Workstation		

제품설명 : Sequoia - High Definition Digital Audio Workstation
 Sequoia handles the entire broadcast production chain :
 Recording, advanced editing, mixing, mastering. CD burning and audio export are carried out directly from the multi-track project including all effects and edits without bouncing or time loss.
 For more involved (multi-track) editing, Sequoia offers unique features like multi-synchronous cut, a consistent further development of the source/destination editing model, including a convenient crossfade editor.
 Comprising a set of restoration tools, Sequoia perfectly integrates into digitalization environments.
 AAF / OMF support enables projects to be exchanged between platforms quickly. Sequoia is the approved German broadcast industry standard.
